Work Experience

- Crafted schoolhues.com an alluring platform where unemployed teachers connect with institutions offering job vacancies. With a visually stunning interface and seamless functionality, the website provides an immersive experience. From dynamic job listings to secure messaging, ensured a captivating and efficient connection between teachers and institutions. The responsive design guarantees a delightful user experience across devices, making schoolhues.com the go-to platform for connecting talented teachers with exciting job opportunities.

- Helped in developing Andazzz.in, a user-friendly, secure cloth reselling website. Designed an attractive layout, integrated e-commerce functionality, and optimized it for search engines. Also implemented secure payments, user registration, and social media features. With efficient admin tools, seamless browsing, and testing, Andazzz.in became a visually appealing and intuitive platform.

- As part of a collaborative team effort, I took a leadership role in developing a user-friendly Library Management System using C. This program effectively manages book, borrower, and author information, allowing for seamless addition, updating, and deletion of data. By eliminating the need for login credentials, we ensured a hassle-free experience for users. Our focus on creating a simple interface facilitated effortless navigation. Additionally, we incorporated a convenient TXT data output format, which can easily be converted to CSV by modifying the file extension.

- Head Manager of School Annual Function, leading a team in coordination and executing event logistics. Ensured seamless stage setup and overall event management, delivering a memorable experience for participants and attendees. Demonstrated strong leadership skills, effective communication, and ability to work under pressure.

Education History

2022-2026

SRM University, AP

- Bachelor Degree of Computer Science Engineering
