FRONTEND DEVELOPER

A coding enthusiast, specializing in handling and managing day-to-day team operations with considerable experience in reading modern trends.

SKILLS

- C/C++
- Figma
- HTML / CSS
- Javascript

EXPERIENCE

SchoolHues
Front-End Developer Intern
Crafted an alluring platform where unemployed teachers connect with institutions offering job vacancies. With a visually stunning interface and seamless functionality, the website provides an immersive experience. From dynamic job listings to secure messaging, ensured a captivating and efficient connection between teachers and institutions. The responsive design guarantees a delightful user experience across devices, making schoolhues the go-to platform for connecting talented teachers with exciting job opportunities.

PROJECTS

A Login / Signup Page
I designed a login/signup page in Figma and translated the concept into a fully functional frontend using HTML and CSS, enhanced with JavaScript for seamless user interaction.

Amazon Clone
I recreated the frontend of Amazon.com using HTML, CSS, and JavaScript, mimicking the user interface and design.

Portfolio Website
This portfolio website, crafted with HTML, CSS, and JavaScript, showcases my skills and accomplishments through an engaging and interactive online platform.

WORD.IT
Actively engaged in the development of a sophisticated blogging platform using ReactJS, providing users with a seamless experience for creating and browsing blogs. Creating a dynamic, user-friendly interface to promote content creation and consumption while demonstrating strong proficiency in front-end web development.

EDUCATION

Bachelor of Computer Science Engineering

SRM University, AP.
